

**EXAM CONFLICTS DUE TO OBSERVANCE OF RELIGIOUS HOLY DAYS.**

Students who are unable to write a final examination(s) during the regularly scheduled time slot because of a conflict with religious conviction must apply for the alternative examination(s) in the course(s) involved by the end of the normal add/drop period for the particular session. The Registrar's Office will schedule the alternative examination(s) for those students in another slot(s) within the regular examination period. Please download the appropriate form from <http://www.uwindsor.ca/registrar> and submit to the Office of the Registrar.

**WRITING THREE OR MORE EXAMS ON THE SAME DAY**

A student scheduled to write three invigilated final examinations in one calendar day, or three or more final examinations in consecutive time slots over a 24-hour period, may apply to have one examination rescheduled on an alternate examination day. The determination of which examination shall be rescheduled and the date of the alternate examination (may be the last possible day of the examination period) shall be made by the Registrar. Please download the appropriate form from <http://www.uwindsor.ca/registrar> and submit to the Office of the Registrar.

**Note:** These applications must be submitted by the end of the fourth week of classes (second week of classes for 6 week courses).

"This course is aimed towards graduate students, preferably with industrial/ automation and controls experience, who want to enhance their strategic leadership skills suitable for needs of global manufacturing enterprises, in particular in their future roles as a system engineer making effective decisions in the development of production and manufacturing assembly line. Topics include forward and inverse kinematic solutions to open and closed chain manipulators, the Jacobian, dynamics and control, sensors and actuators. In addition, Global Robotic specifications (GRS) will be introduced at high level. The laboratory exercises will be provided in addition to solving related problem to each lecture and will be hands on experience using advanced simulation of real systems. Students will be exposed to real life problems and solutions of industrial robots using state of art of true DM for robotics work-cell design SW is used (PS, V13.1a; SIEMENS SW)."

Topics include forward and inverse kinematic solutions to open and closed chain manipulators, the Jacobian, dynamics and control, sensors and actuators. In addition, Global Robotic specifications (GRS) will be introduced at high level. The laboratory exercises will be provided in addition to solving related problem to each lecture and will be hands on experience using advanced simulation of real systems. Students will be exposed to real life problems and solutions of industrial robots using state of art of true DM for robotics work-cell design SW is used (PS, V13.1a; SIEMENS SW)."

Do you have a brilliant startup idea and want to learn how to start a business? Students in this class will work in multi-disciplinary engineering teams to develop an understanding of how to start a business and turn novel ideas into profit. This course will allow student to develop an understanding of how to start a business. Open to graduate level students who've completed at least three courses in their program.

In this course, students learn about smart cities and their relation with sustainable and resilient cities. They are presented with good practices of smart cities around the world and the state-of-the-art technologies that were used. They will see a city as a complex system and learn about two approaches of looking at complex issues including system thinking and SWOT analysis. Smart grids, transportation networks, urban agriculture, cyber security, and the advancement of ICT and their applications in smart cities will be discussed. They will be encouraged to select a city problem, find solutions, design scenarios or prototype their inventions as their assignment.

<b>1163-580</b>	<b>Selected Reading/Nursing/Grounded Theory</b>							
Section 95	3.00	LEC	MW	09:30	12:20PM	O'Neil Medical Education Centre	3102A	Giannotti, Natalie

Section Offered as Partial Distance Education

"This course section will be offered by partial distance - i.e. some classes will be delivered online, and other classes will be delivered in person on campus only. On campus classes will take place on Mondays, and online discussions will take place on Wednesdays. Students only need to attend classes in person on Mondays. There will be no scheduled time for online discussions as long as they are completed by the end of day on Wednesday. Classes will not be recorded. Presentations will be part of the class and will take place on Mondays."

This course provides an introduction and in-depth description, analysis, and application of the traditional Glaserian, Straussian, and Constructivist grounded theory methods. A major focus will be on students' development of theoretical sensitivity via group and individual exercises, reflection, and research. Students will be introduced to the utility of grounded theory research in informing clinical practices and processes and the development of disciplinary knowledge and selected disciplines. The course will be useful for both the novice and experienced researcher, and can be either the basis or beginning of thesis research.

Section Offered as Partial Distance Education  
 "This course section will be offered as a hybrid model. Students have the option to attend classes in person on campus or live online via Blackboard Collaborate, as per the class schedule. For most classes, the instructor will present simultaneously in class and through Collaborate to students who are off-campus. The off-campus (online) students will be able to participate in the live classes and ask questions through the Collaborate interface. Depending on the class activity/content, there may be some classes where students will be required to attend class in person on campus, rather than online. The instructor will provide this information at the start of the course. All tests, quizzes, mid-term and final exams must be written in person at UWindsor campus unless otherwise specified by the instructor."
